

High Feed Turning (HFT-O / HFT-D) with CBN

HFT System with Octagon & Rhomboid Shape CBN Inserts

Advantages:

- Up to 8 times higher productivity than conventional hard turning
- Octagon CBN insert (8 cutting edges) and rhomboid shape CBN insert (2 cutting edges)
- Special wiper technology with smooth cutting edge entry on the workpiece
- Good surface roughness ($R_z < 4 \mu\text{m}$) even at elevated feed rates of $f = 1,2 \text{ mm/rev}$
- Stable monoblock design holders based on HSK, ISO-PSC, VDI, KM or DIN coupling
- High cutting removal rates while maintaining required qualities
- Special tools on request available

For Hardened Steel High Feed Turning (HFT-O)

Monoblock Tool Holders in Various Design

Combination possible to adopt to different applications like boring, facing, outer diameter turning, chamfering.
Couplings available as VDI, ISO-PSC, DIN, KM and HSK shank.

VDI

ISO-PSC

DIN

KM

High stability double clamp system

Direction defined coolant / air supply

ONXA octagon CBN insert

Easy handling and secure insert guiding in stable insert seat

Cutting Conditions

General Conditions*	$v_c = 80-200 \text{ m/min}$	$f = 0,2-1,2 \text{ mm/rev}$	$a_p = 0,05-0,25 \text{ mm}$
---------------------	------------------------------	------------------------------	------------------------------

* are set according to the project

CBN Choice

Grade	BNC200	BNC30G
Typ of cut	Continuous cut	Interrupted cut

HFT-O Offering Production Cost Reduction

Cutting process time was reduced **90 %**

Productivity roughing

HFT-O
 $v_c = 150 \text{ m/min}$
 $f = 1,2 \text{ mm/rev}$
 $a_p = 0,12 \text{ mm}$

Standard
 $v_c = 100 \text{ m/min}$
 $f = 0,18 \text{ mm/rev}$
 $a_p = 0,10 \text{ mm}$

Increased productivity

12 times

Productivity finishing

HFT-O
 $v_c = 150 \text{ m/min}$
 $f = 0,8 \text{ mm/rev}$
 $a_p = 0,03 \text{ mm}$

Standard
 $v_c = 120 \text{ m/min}$
 $f = 0,14 \text{ mm/rev}$
 $a_p = 0,05 \text{ mm}$

Increased productivity

16 times

Result: **HFT-O** = 12–16 times faster than existing process with keeping the requested tolerances and surface roughness requirements.
Insert offers double number of cutting edges. Additionally, the tool life could be doubled.

General Details

To machine close to shoulder (inner or outer diameter) you need a relief groove of approximately 8 mm.

Distance overhang shaft exit 1 mm Safety distance shaft entrance 1 mm

Safety distance hole entrance 1 mm Distance overhang hole exit 1 mm

General Details

For Hardened Steel High Feed Turning

■ Application Range

Inner Diameter Turning

- Through hole application is recommended (blind hole makes chip stacking and jamming).
- Inner diameter has to be more than 50 mm.
- Additional interfaces can be adapted to increase the turning length.
- Length of cut is recommended less than 3xD.

Outer Diameter Turning and Facing

- Straight outer diameter turning and facing.
- No limitation of work size, but rigidity of the workpiece and clamping is important.
- Additional interfaces can be adapted to increase the turning length.

Taper, Sheave Surface Turning

- Different approach angles of the insert can be introduced into the system according to the customer's requirements.

Inner Diameter Turning

Ring Gear , HFT-D, BNC200

Face Gear, HFT-O, BNC30G

Pipe, HFT-D, BNC30G

Inside Turning, Outside Turning

Bearing Ring, HFT-D/HFT-O, BNC200, BNC30G

Inside Turning, Front Facing and Rear Side

Shift Wheel, HFT-D & ISO, BNC200

Outer Diameter Turning and Facing

Drive Shaft, HFT-D, BNC200

Drive Shaft, HFT-O, BNC30G

Protection Disc, HFT-D/HFT-O, BNC200

Taper, Sheave and Surface Turning

Taper Roller, HFT-D, BNC200, BNC30G

Taper Roller, HFT-D, BNC200, BNC30G

Bearing Ring, HFT-D/HFT-O, BNC200, BNC30G

For Hardened Steel High Feed Turning (HFT-O)

HFT DOXN R/L 2525M 1204

* Right handed (R) inserts can only be used in right handed (R) tools.

** Left handed (L) inserts can only be used in left handed (L) tools.

*** Can be used in right (R) or left (L) handed tool holders. Round inserts produce less cutting pressure when turning compared to octagonal inserts, but the quality of surface finish is also reduced.

⊙ Preferred choice

○ Suitable

— Not possible

■ Identification Details - Holder

VDI	40	HFT	OD	43	065	DOXN	R/L	1204
Cylindrical Shank	Shank Diameter	Holder Description „High Feed Turning“	Outer Diameter Turning	Cutting Edge Distance	Functional Length	Clamping System D: Double Clamp O: Insert Shape X: Holder Style N: Relief Angle=0°	Feed Direction R: Right Hand L: Left Hand	Insert Size

● = Euro stock

For Hardened Steel High Feed Turning (HFT-O)

VDI40 HFT ID 25105 DOXN R/L 1204

Boring, Outer Diameter Turning possible

Above figures show right hand tools.

Attention: You need approximately 8 mm overhang on the shoulder (see page 2)

For Hardened Steel High Feed Turning (HFT-O)

■ Technical Details

Spare Parts for HFT-O Square shank holder

Spare Parts for Clamping System:

- ① SCP2 → Clampset
- ② LH040 → Clamp Wrench
- ③ CSCFHFT → Shim
- ④ MIB1.6-3 → Screw
- ⑤ SDBSM → Screw Wrench

Spare Parts for VDI40-, PSC50 HFT-O Toolholders

Spare Parts for Clamping System:

- ① SCP2 → Clampset
- ② CSCFHFT → Shim
- ③ MIB1.6-3 → Screw
- ④ SDBSM → Screw Wrench
- ⑤ LH040 → Clamp Wrench
- ⑥ TRX10 → Torx Wrench

Spare Part Set for Coolant Supply:

- CBLHFTSP/
 - CBRHFTSP
- ⑦ Screw
 - ⑧ Coolant Block
 - ⑨ Seal

For Hardened Steel High Feed Turning (HFT-D)

■ Technical Details

Spare Parts for HFT-D Shank

Spare Parts for Clamping System:

- ① SCP2 → Clampset
- ② LH040 → Clamp Wrench

Spare Parts for PSC50 HFT-D Toolholders

Spare Parts for Clamping System:

- ① SCP2 → Clampset
- ② LH040 → Clamp Wrench
- ③ TRX10 → Torx Wrench

Spare Part Set for Coolant Supply:

- ④ Screw
- ⑤ Coolant Block
- ⑥ Seal

For Hardened Steel High Feed Turning
